 a word common to all Teut. languages. The derivation from Lat.
caupona is hardly admissible, whereas Grimm's ingenious suggestion
 (Dict. iii. 198) connecting it with Goth. *kaupatan*, which Ulf. uses =
 to strike in the face, is strongly borne out by the very form of the Icel.
 word;—since, first, this word, although having *au* as its root vowel,
 follows the 2nd and not the 1st weak conjugation; secondly, the vowel
 changes in preterite and participle, which is characteristic of a verb
 with an inflexive or characteristic *j*; thirdly, the *t* in the preterite (so
 far as is known) is never spelt with *ð* or *þ*,—keypti, not keypti or keyppi
 (see introduction to letter D, C. III. 2),—which indicates that the *t* is
 here radical and not inflexive. The Icel. word therefore represents in its
 tenses both the Gothic words,—kaupan in the present tense, kaupatan
 in the preterite: the bargain was symbolized by 'striking,' hence the
 phrase 'to strike' a bargain, Dutch *koopslagen*.] B. To buy; magran mar kaup, Hm. 83; kaupna frið, Skm. 19;

 KUMBL, kumbl, kulbl, n. This word is chiefly interesting because
 of its frequent occurrence on the old Dan. and Swed. Runic stones, where
 it is always used in plur.; the spelling varies, kuml, kulbl, or kumbl; in
 old Icel. writers it only occurs a few times, and they even use the sing.;
 it is now quite obsolete: I. prop. a sign, badge, mark, [A. S.
 cumbol; Hel. cumbal and cumb = signum], a war badge, esp. used of
 any heraldic emblems; yet in the Scand. language this sense is rare,

—kuml konunga ör kerum valdi, Gh. 7; kumbla-smiðr, a 'cumbol' smiðr, Akv. 24; the compd her-kuml, the badge worn on the helmet; jötun-k., the giant's mark, i. e. the badge of being the giant's kinsman, Fas. ii. (in a verse); and lastly in ör-kumla, a lasting scar, maiming for life, cp. kumla below.

II. in Scandinavia, analogous to the Gr. *σῆμα*, kuml came to mean 'a monument', a cairn, *how*; in the phrase, göra kuml (kubl), synonymous to göra mark, merki, which also occurs (e.g. Baut. 138, 214, 461, 722, 1143); kuml is the general term, opp. to stain, rúnar, which are special terms; thus distinction is made between stain and kuml, Baut. 771: 1. on Runic stones, 2. on Danish stones, Tunki raiði stain þausi ok garði kubl, Rafn 213; Asfriþr görþi kumbl þann, Thorsen 43; kubl þusi, 23; þurmundr niout (i. e. njót!) kubls, Tb. enjoy thy kuml! rest in peace! 265; Ala sunir garþu kubl þausi aft faþur sinn, Rafn 103; sþi þá mannr es þausi kubl upp briuti, a *curse* be on the man that breaks this k., 205; Usk garþi kumbl þisi, 202; Haraldr kunungr þaþ gaurva kubl þausi at Gurm faþur sinn, 39, (Jellinge.)

2. in Icel. a *cairn*; en mannföll þessi eru sögd eftir kumlum þeim er fundin eru, þar er bardagarnir hafa verit, Gullþ. 25; þar féll þórarinn krókr, ok þeir fjórir, en sjau menn af Steinólfi, þar eru kuml þeirra, Landn. 128; þar féll Skeggbjörn ok átta menn aðrir, þar er haugr Skeggbjarnar á fitinni, en aðrir vóru jarðaðir í Landraugs-holti þar hjá fitinni, ok sér þar enn görla kumlín, Bs. (Kristni S.) i. 15; ok reimt þýkkir þar síðan vera hjá kumlum þeirra, Isl. ii. 115; in sing., þau liggja bæði í kumlí í Laxárdal, Ld. 158; þorkell vill nú bera aprt sverðit í kumlit, . . . saxit var ok upp tekitt ör kumlí Nafars, Rd. ch. 19; þá gekk hann í dalverit líptið ok fann þar kuml manns, þar þreifaði hann niðr fyrir fætr sér, ok fann þar manns bein ok sverð eitt, Draum. 129. The worship of hews and cairns was forbidden even in the heathen age as being connected with sorcery, see haugr, högr, whence blætr kumbla, a worshipper of cairns, a wizard, warlock, a term of abuse, Eg. (in a verse); kumla brjótr, Korm. S., is also prob. a false reading for bljótr or blætr.

 -λογία, as in *ana-qiss* = *βλασφημία*; *þiupi-qiss* and *waila-qiss* = *εὐλογία*;
missa-qiss = *σχίσμα*, etc.];—prop. a *saw, saying, speech, word*, and hence
 in law a *verdict* given by neighbours; for the Engl. 'verdict' is indeed a
 kind of rendering of the Norse term; kvíðr Norna, the word of the Norns,
 weird, fate, death, kveld lífr maðr ekki eptir kvíð Norna, Hðm. 31;
 orðs-kvíðr, a *saw, proverb*; mis-kvíðr, 'saying-amiss,' false pleading.
 The old law makes a distinction between vætti (a witness) and kvíðr
 (a verdict).—þar er bæði fylgir einni sök vætti ok kvíðr, þá skal vætti
 fara fyrr fram en kvíðr, Grág. i. 47; before delivering his opinion each
 neighbour had to take an oath,—þat er mælt, áðr kvíðr sé borinn, at þeir
 skulu eða vinna allir áðr at dómi, 53. The old records mention various
 kinds of neighbours and verdicts: 1. in Norse law, a. the
 heimis-kvíðr (heims-kvíðr, heimilis-k.) or a 'home-verdict,' a verdict of
 neighbours, bearing some resemblance to the oath of compurgators; ten,
 or in lesser cases four or six, neighbours were to accompany the accused
 to the court, two of whom had to swear on the book, and the rest
 followed,—en þat er heims kvíðr er tíu menn fylgja til móts, en sverja
 tveir menn á bók, en átta sanna þat, N. G. L. i. 311, cp. ii. 505; háfa
 með sér heimiliskvíðar-vátta til þings, K. Á. 214; hann háfi heiman
 heimiliskvíðar-vitni, 152; nema heimiliskvíðar-vitni fylgi, Gpl. 193;
 þá skal með þessu heimiliskvíðar-vitni sækja, N. G. L. i. 140 (heims-
 kvíðar-vitni, 337); þá skal með þessu heimiliskvíðar-vitni sækja, at
 einn skal bera en tveir sanna um þriggja aura mál, en um sex aura mál
 skal einn sanna en fjórir sverja, en þeir skulu vera fylkis-menn, N. G. L.
 i. 140, 316; en ef eigi kemr saga hins sára fram á fyrsta þingi né
 heimiliskvíðar-vitni, þá . . . 160: similar were the 'sandemænd' (*sooth-*
 00 men) of the early Danish law; to this the old saw refers, hættir er heimis-
 kvíðr, nema sér göðan geti, *perilous is the home-verdict, unless one gets a*
 good one, Sdm. 25. β. in Icel., unless the bjargkvíðr (q. v.) be iden-
 tical to heimis-kvíðr, this sort of verdict is seldom mentioned; eigi skal
 heimis-kvíðr annan at henda, Grág. i. 361. 2. in Icel. law the tólfstar-
 kvíðr (*verdict of twelve*), also called goða-kvíðr (*priest verdict*), Grág. i.
 168, viz. a body of twelve men, of whom eleven were to be summoned
 by the goði of the district, and he, being the twelfth of the number, had
 to deliver the final verdict. The verdict of twelve was only appointed
 for certain cases defined in the law, K. þ. K. 168, v. l.; nú hefir maðr
 tólfstar-kvíðar kvatt, ok skal goði nefna þriðjungs-menn sína til kvíðar
 þess með sér, ok er honum rétt hvártr þeir eru en bændr eða gríð-menn,
 hann skal ellefu menn nefna aðra en sík, Grág. i. 57, see the whole
 chapter 17 in þ. þ., as also the Grág. passim; ella kveðja til tylvtar-
 kvíðar goða þess (hann?) er sóttir er . . . en ef sjálfir er sóttir goðum

þeirri sök, þá skal kveðja samþingis-góðann tólpár-kviðar; tólpár-kviðar skal kveðja þann góða er sá er í þingi er sóttur er, Grág. i. 138; er góði er kvadr tólpár-kviðar um þat er hann á eigi at skilja, þá . . . , 163, 207; nú koma menn til þings, ok málit í dóm, ok á Glúmr (in his capacity as góði) at bera tólpár-kvið, . . . Glúmr ber af honum kviðinn ok únytti málit, Glúm. ch. 18; tólpár-kviðr átti um at skilja, en hvárgi þeirra Snorra né Arnleik þótti bera mega kviðinn fyrir hleyta sakir við sækjanda ok varnar-áðilja, var þá Helgi Hoigarða-góði kvadr tylptar-kviðar, . . . eptir þat bar Helgi af kviðinn, Eb. ch. 16, cp. also the passage in Lv. ch. 4, where a verdict of twelve seems to be meant. β. but the common popular vǫrdict was the búa-kviðr or *neighbour-verdict*, given by five, and in some cases by nine, neighbours (see búi), who had to be summoned either at home (kveðja búa heiman) or in certain exceptional instances in the court (á þingi); the instances in the Grág. and the Sagas, esp. the Nj., are almost endless: technical phrase, bera kvið, to give the verdict, Nj. 87, Grág. i. 57, passim; as also, bera af kviðinn, or, bera á kviðinn, to give a verdict for or against, (see bera B. 1); ryðja kviðr ok kviðu, prop. to 'clear the verdict,' i. e. to challenge the neighbours, Grág. i. 29; bjóða til rúðningar um kviðinn, Nj. 87, passim.

γ. a special kind, egningar-kviðr, a kind of law *quirk*, Grág. i. 56; ironical, nú er getið um fyrir þorkatli at honum þykkja ríkt bornir kviðirnir, Lv. 27. From the analogy of the Icel. customs, it can be inferred with certainty that along with the invasion of the Danes and Norsemen, the judgment by verdict was also transplanted to English ground, for the settlers of England were kith and kin to those of Iceland, carrying with them the same laws and customs; lastly, after the Conquest it became the law of the land. This old Scandinavian institution gradually died out in the mother countries, and came to an end in Icel. A. D. 1271–1281, with the fall of the Commonwealth, and the introduction of a Norse code of laws, whereas it was naturalised in England, which came to be the classical land of trial by jury.

L

is the eleventh letter of the alphabet, and the first of the vowels. In the Runic alphabet on the Golden horn, as well as in the Old Norse, it was represented by L , called *lög*, q. v. (lögr er það er falli, Runic poem; A. S. *lagu*), and was, as the form shews, drawn from the Greek or Latin alphabet. In old MSS. a L is often used for *ll*, see Bs. i. 333 sqq.

The *l* is in Icel. sounded as in other Teut. languages; but *ll*, *ll* and not combined with another consonant, had a peculiar sound, almost *dlb*, thus, gull, fall, hella, kalla, = gudhl, fadh, hedha, &c. This pronunciation is still observed in Icel. as well as in some dialects of western Norway, Vorse-vangen, Sogn, Hardanger; and other parts of Norway it is sounded as *dd*. There are no means of ascertaining with certainty whether the ancients sounded *ll* exactly as it is at present do, or whether it was not more aspirate than dental.

2. the peculiar aspirate sound of *l* before a radical dental consonant. Gram. p. xxvii. (II): thus holt, allt, gult, íllt, hallt, etc. (and are still sounded) as holtht, alht, gulht, íllht, halht; as old writers before *d*, hold, kald, = holhd, kalhd, although in mod. pronunciation the aspirate sound is less perceived before a media than a tenuis.

In some Icel. words the *ll* is due to assimilation, and answers to the Saxon and Germ. *ld*, e. g. Icel. gull = Goth. *gulþ*, Engl. and *ld*; it is however likely that originally these words were dissonant from those which had a radical *ll*, and it may be that the peculiar sound of *ll* was due to this cause—that the sound assimilated *ll* prevailed and became universal, whilst the original sound was lost; though even in the earliest rhymes no distinction is perceived.

2. in much later times *ll* assimilated into *ll* words, brálla = bráðla; as also *lr* into *ll* in inflexions, höll = hölr, Gram. p. xvi. (I. 3. a): in still later times *rl* changed into *ll*, *rl*, varla, etc., which in mod. pronunciation is sounded as jall, &c.; but this is not observed in writing, although it is so in print, as also in MSS. of the 15th century.

LYRITR, m., or better **lyritr** or **lyrittr**, gen. lyritar (but lyrits, Grág. ii. 233), dat. lyriti, plur. lyritar, N. G. L. ii. 94, Jb. 193; the quantity cannot be ascertained because the vellums do not distinguish between long and short vowels; it is spelt with one *t* throughout the Grág. (Kb.); the alliterative phrase *lagalyritr*, as also the invariable spelling in the Grágás, shew that the word had no initial *b*. Former attempts at an etymology, from læ and rita (Björn á Skarðsá), hlýrar and réttir (Pál Vidal), lygi and rítr (Fritzner), must be dismissed; the spelling *lyrifar*, which once or twice occurs in Norse MSS. of the 14th century (N. G. L. i. 394, ii. 94, v. l. 19), is probably a mere corruption. **lyritr** is a compd word from lög, law, and rör or reytr, a *landmark*, which word in the old Swed. law exactly answers to *lyrit* in the Norse law; *lyrit* is thus qs. lýr-ryt-ri, by assimilation and by weakening the *y* into *i*, *lyritti*; the *t* being inflexive: its literal sense, therefore, is a *lawful rör or landmark*. In Sweden there were often five mark-stones, but it is added (Schlyter iii. s. v. rör)—fiuri stenar ok þri stenar mughu rör heta=*four stones and even three stones may be called rör*, i. e. *make a 'law-rör', a lawful landmark*, a *lyrit*; this, we believe, is the etymology of this much-contested word. About the gender (masc., not fem.) there can be no doubt, from the numerous instances in the Grágás; but in the 13th century the word began to become neuter, thus we have *lyritit*, Grág. (Kb.) i. 103, lines 14 and 21, but *lyritium* several times in the same page; nom. *lyriti* in Grág. (Sb.) ii. 226; and efalaus *lyriti*, Nj. passim.

B. SENSE: I. prop. when the boundary of a field or estate was to be drawn, the law prescribed that a mark-stone (mark-steimi) should be raised on the spot, and three other stones laid beside it; these three stones were called *landmark-stones* (lyrit-steinar or lyritar); by their number and position they were distinguished from all other stones in the field, see N. G. L. ii. 94, cp. note 19 (Jb. 193). II. metaph. in the lcel. law, a *full title of possession, a full claim to right or property*; thus defined by Konrad Maurer—'Lyrit bedeutet in der Grágás und in den älteren Sagas das volle Eigentums-recht, oder auch den Bann, der dem Grunde-gentümer zum Schutze seines Eigentumes, dem Goden aber Kraft seiner Amtsgewalt zusteht.' I. the earliest kind was probably the *land-lyrit* or '*land-ban*'; this law term was originally borrowed from the mark-stones themselves, and then came to mean a *full title to land, field, pasture, or estate*, Grág. ii. 224, 225:—eignar-lyritr, *full lawful possession, a legal title of ownership*; hafa eignar-lyrit fyrir landi, 204, 222. 2. a

veto; Goða-lyritr, *the veto of a Goði (Priest)*, forbidding the court or neighbours to deliver a sentence or verdict in a case, and thus quashing the suit. A Goði alone, by virtue of his office, was entitled to stop a court in this way, whether personally or by one of his liegemen, so that if any one else wished thus to stop a suit, he had first to go to his liegelord (Goði) and be authorised by him to do so; cp. the phrases, taka lyrit af Goða, selja lyrit, ef Goði færir lyrit sinn sjálf fram, and similar law phrases, Grág. i. 109—111, cp. esp. þ. þ. ch. 38; neglect of this was contempt of court, punishable by the lesser outlawry. The word lyritr occurs at every step in the Grágás, as in the phrase, verja lyriti, or verja e-t lyriti, *to defend through a lyrit*, i. e. *to put under veto, to vindicate one's right, forbid*, or the like; eigi varðar hagabött, nema lyriti sé varið, Grág. ii. 224; verja lyriti haga, 225; þótt maðr veri fleirum lyriti (dat.), 226, Nj.; láta lyrit koma fyrir sök, *to stop on a case*, Grág. i. 109; kaupr land laga kaupi ok lyritar, *to buy land by a lawful bargain and with full title of possession*, ii. 213; eptir þat nefndi þorkell sér vátta, ok setti (varði?) þeim lyriti, ok fyrirbaud þeim at dæma, Lv. 31; ok er únýt stefna hans eðr lyriti (lyritr?), Grág. ii. 226; hann (the Goði) skal nefna sér vátta, áðr hann færi lyrit fram, í þat vætti, at ek ver lyriti, goða-lyriti, löglyriti fullum dómdómum at dæma um sök þá... enda skal hann svá verja kvíðmönnum lyriti, at bera kvíðu um hann, i. 111; ek ver lyriti mínum, löglyriti dómdómum at dæma, id.; færa lyrit sinn fram, *to utter one's veto*, id.; fara með land-lyriti, ii. 225. COMPDS: lyritar-eiðr, m. a 'lyrit-oath,' a kind of oath of compurgation in the Norse, but not in the old Icel. law; it was an oath of three, viz. of the person who took the oath, with two compurgators, in remembrance of the three lyrit stones, which gave the name to this oath of compurgation; nú skal lyritar-eið svá vinna, sjálf skál hann vinna, ok annarr jafnréttis-maðr, ... sá skál enn þriðr, er . . . , N. G. L. i. 56, cp. Js. 30, Jb.; stendir lyritar-eiðr fyrir hvárt þriggja marka mál ok þau er minni eru, N. G. L. ii. 306; hón skal þess synja með lyritar-eiði með frjálsum konum tveimr, i. 376 (394), of a compurgatory oath in the case of a still-born child. lyritar-varzla, u, f. a *ban* by lyrit, Grág. i. 263, 353. lyritar-vörn, f. = lyritarvarzla, Grág. ii. 219.

maðr, m. [old Swed. *lagman*; the president of the supreme court held in Orkney was called the *lagman*]:—*law-man*. In the Scandinavian kingdoms each legal community or state (*lög*) had laws, its own parliament (*lögþing*), and its own 'law-man' (*lagh-maðr*); the *lagman* was the first commoner and the spokesman of the people against the king and court at public assemblies or elsewhere and also the guardian of the law, and the president of the legislative and of the law courts. As in the heathen time laws were not written, the *lagman* had to say what was the law of the land in any case in the general assemblies, at least in Iceland, he had to 'say' (from memory) to the assembled people from the Law-hill (*lögberg*); hence in the Icelandic Commonwealth he was called *lög-sögu-maðr*, the 'law-speaker,' 'law-sayer,' 'speaker of the law,' and his office or *lög-sögn* = 'law-speaking.' 1. Sweden and Gothland in the classical lands of the *lagmen*, for the whole kingdom was a confederation of commonwealths, each with its parliament, laws, and laws, who were all of them united under one king; see the records in the old Swedish laws, *Sveriges Gamla Lagar*, as cited in the text, as also the classical account given of *lagman Thorgny* in O. H. ii. 17.—*í hverri þessi deild landsins er sitt lögþing, ok sín lög, yfir lögum er lögmaðr, ... þat skulu lög vera sem hann ræð upp at lögum; ef konungr, eða jarl, eða byskupar fara yfir land ok eigu þing við þá svarar lögmaðr af headi búenda ...; aðrir lögmenn allir skulu lög-menn þess lögmanns er á Tiunda-landi er, O. H. 65. 2. Norway in the political institutions of the old patriarchal ages were disturbed through the wars and conquest of Harald Fairhair; the laws of Norway too have been preserved in a much more complete state than those of Sweden; of some of the most interesting records of the ecclesiastical section has been preserved, often in Icelandic or abridged. The most interesting records of the *lagmen* are not to be found in the Norse laws, but in the Sagas, e. g. the *Hák. S. Gamla*, ch. 71–80, 85–97 (in the Flatey book), the *Þinga-páttir* in Fms. vii. 123–150, and in stray passages in the other Sagas, in such phrases as *lögmenn ok konungr, lögmenn ok lenda menn ok lögmenn ok alla alþýðu*, Eg. 352. 3. Middle Age in Norway, and in Icel. after 1280, the *lagman* was a justice, who presided in the court *lögrétta*, at the *lögþing*, *passim*. 4. in the Icelandic Commonwealth, the office of *lagman* has been described above as specially called *lög-sögu-maðr*; *lögmaðr* is only used = *lagamaðr* = a *lagman*.—*þat er ok, at þat skal svá górla þáttu alla upp segja, at engi viti einna miclogi honum vinski eigi fróðleikr til þess, þá skal hann eiga stefnu lögmenn (lawyers, men skilled in law), ok næstu dægr ádr, eðr Gr. i. 2, 3; þat skal allt hafa er finnsk á skra þeirri er Hafliði er þat eitt af annarra lögmanna fyrirsögn (of other lawyers) er þá þvi í gegn, 7; Njáll var lögmaðr svá mikill (so great a lawyer), eingi fannsk hans jafningi, Nj. 30. At the union with Norway (1272) the *lög-sögu-maðr* of the Commonwealth was replaced by the *men* of the Norse kind, so that in the Sagas composed after 1272, e. g. the *Grettla*) or in Sagas preserved in later transcripts, the *lagman* now and then conformed, and '*lögmaðr*' was, by way of conformity, used of the *lög-sögu-maðr* of the old Commonwealth, cp. 6, 115, 173, 191 new Ed., Nj. 24, 164, 237 (v. l.), Eg. 597, Ísl. i. 208, 238, 256, Bs. i. (Hungv.) 62, Fms. iv. 115, 176, 177. O. H. edition has the true reading, being made from a version of the Commonwealth time. β. two instances are recorded in the 10th century in Iceland, where a *lögmaðr* occurs as a *county sheriff* or *officer*, viz. in the *Hák. S.* (begin.) and the *ch. 10*; but both records seem to be spurious and adapted to things in Norway, for neither Saga is preserved in its pure text, but remoulded after the union; see Maurer's *Entstehung der Sates*, Beiträge, 136 sqq. In Scandinavia during the Middle Ages the power of the king increased, so that of the old *lagman* the last died away. In England it is preserved in the Speaker of the Commons, whose very name recalls to mind the law of the old Scandinavian communities. M

(mm), the twelfth letter of the alphabet, was in the oldest Runic inscriptions (the Golden horn, the stone in Tune) figured \mathfrak{M} , and in the common Runes \mathfrak{M} and \mathfrak{P} , whence later, the top being left Ψ and Υ ; all these forms being clearly derived from the old \mathfrak{M} . Its ancient name was *maðr* (a *man*)—*maðr* er moldar-auki; in a Runic poem; but the likeness of Υ to a man with uplifted hands is accidental.

SPELLING, CHANGES.—The *m* is sounded as in English and other European languages: it is usually single in the words *fin*=*five*, *um*=*in*, *fram*=*framm*, but erroneously, for it is sounded double, agreeing with the etymology. Changes: 1. Peculiar to the Northern languages is the interchange of *mu* and *fu* when both letters are radical; *namu*, *nemna*, = *nafni*, *nefna*; *samni*, *samna*, = *safni*, *safna*; *jamu* = *jamna*, *sómm*, = *sófna*, *svefni*; *hemna* = *hefna*; *stamm* = *stafni*; *stomni*; *hranni* = *hrafn*: the oldest Icelandic vellums frequently use the *namn*, *samna*, *hramn*, *jamn*, but more rarely in other instances, *Blas*. 46; *emni*, *Arna-Magn.* 302. 3; *somna*, *MS.* 623. 34; *sómm*, *D.H.L.* 82, 83; *sjómm*, *Pd.* 14; it is still sounded instead of *fu*, as in *hefnd*, *proned*, *hemd*, *Hom.* 7, 18; *stemi* = *stefndi*: the *v* prevailed in the Icel., and is used in the Editions, as also in the usage: on the other hand, the Swedish has throughout adopted *m*; thus, *Swed. bamm* = *Icel. höfu*, *Engl. baven*; *Swed. lämna* = *Icel. þan. levne*; *Swed. ämne* = *Icel. efni*; each language has taken exception without regard to etymology, for in some of the words *f* is used in others *m*.

2. otherwise *m* and *f* seldom interchange, as in the threefold form of the particle of, *um*, *umb*; *himinn*, *himneskr*, *inn*, *hifneskr*; *nema* (*nisi*), *cp. Goth. niba*; *hvilmt* and *hvilft*, as also *Mal-kólfir* = *Mal-kolmr*, *þjálf* and *þjálm*, *skelmir* and *skelm*.

III. in vellums *m* is dropped in the 1st pers. plur. of verbs before the pron. *vér*, *vit*, thus *höfu vér*, *eigu vit*, but in mod. usage *m* is retained; hence comes the Norse form *mér* (plur.), *mit* (dual), by an interchange of the *v* and substitution of the final *m* from the preceding *v*: in *öllu-megin*, *báðu-megin*, etc., see *megin*. In old vellums \mathfrak{M} is used to mark a double *m*, thus *frammi* = *frammi*; in most medieval or final *m* is marked by a stroke above the line. The \mathfrak{M} is often used for the word *maðr*.

MAÐR, *ad.* to become maggoty, *Stj.* 91: *maðkaðr*, part. maggoty. **MAÐA**, *m.* [Ulf. *mada* = *μαδα*; A. S. *madu*; O. H. In Ballads and Rímur after the 15th century, and hence in ecclesiastical later times, a nom. *mann* is now and then used, esp. in compds influenced by Germ. and Engl., e. g. *hreysti-mann*, *Skíða R.* 58; or in the sake of rhyme, *ætla þú ekki, áunur mann | af komast muni hann*, *Pass.* 14. 17: [Ulf. *mannia* = *άνθρωπος*; in other Teut. languages spelt *man*, or better *mann*.]

marmari, a, m. [Lat. word], marble, Stj. 46, Róm. 342, Skv. 188, Bs. ii. 103; marmara-grjótt, -stecinar, slabs of marble, Symb. 57, Str. 5, Karl. 14. mar-mennill, m., thus Landn. 76, 77; mar-mendill, Fas. ii. 31 (thrice); in popular mod. usage in Icel., mar-bendill; the Hauksbók (Landn. l. c.) spells it margmelli; whence the mod. Norse marmale, Ivar Aasen—prop. a 'sea-mannikin', a kind of sea goblin or sea dwarf, in the Norse fairy tales. The marmenill is now and then hooked by fishermen; being a soothsayer, he tells them what is to happen. The classical passages in old Icel. writers are the Hálfis S. ch. 7 and the Landn. 2, ch. 5; for mod. times see Maurer's Volks. 31, 32, as also Ísl. Þjóðs. i. 131–134. Inseparable from these tales is the merman's 'laugþier'; he generally laughs thrice, e. g. the king kisses the queen, beats his dog, and stumbles over and curses the mound, at each of which the merman laughs; and being asked why, he says that he laughs at the king's foolishness, for the queen is false, but the dog is true and will save his life, and in the mound there is a hidden treasure; hence, þá hló marbendill, then the merman laughed, has in Icel. become proverbial of a sudden, unreasonable, and spiteful fit of laughter. The coincidence with the English legend of Merlin the 'wild man' in the romance of Merlin, (edited by the Early Engl. Text Soc. 1869, p. 434.) is very striking; and one is tempted to suggest that the name Merlin may have been borrowed from the Norse sea goblin (who in Norwegian tales is said to be the bastard of the sea monster hafstramb and a mermaid), and tacked on to the Welsh legend: even the word has a Norse or Teutonic sound: Merlin may well be shortened from the dimin. mer-mann-lin, mer-m'lin, merlin: according to the Pref. to this Engl. romance the name is not found attached to the Welsh legend till the 12th century. compds: marmendils-smíði, n. the mermannikin's work = millepora polymorpha. marmendils-þari, a, m. the merman's weed = corallina officinalis, Maurer's Volks.

mið-garðr, m. [in Cumberland three farms, High-garth, Middle-garth Low-garth], the 'mid-yard,' 'middle-town,' i. e. *the earth*, a mythol. word common to all ancient Teut. languages; thus Ulf. renders the Gr. οἰκουμένη by *miðjungarðs*; Hel. calls the earth *middil-garð*; the A. S. homilies instead of earth say *middan-geard* (*meddlert*, Jamieson), and use the word as an appellative; but the Icel. Edda alone has preserved the true mythical bearing of this old Teut. word.—The earth (Miðgarð), the abode of men, is seated in the middle of the universe, bordered by mountains and surrounded by the great sea (úthaf); on the other side of this sea is the Út-garð (*out-yard*), the abode of giants; the Miðgarð is defended by the 'yard' or 'burgh' Ás-garð (*the burgh of the gods*), lying in the middle (the heaven being conceived as rising above the earth). Thus the earth and mankind are represented as a stronghold besieged by the powers of evil from without, defended by the gods from above and from within; see Vsp. 4, Gm. 41, Edda 6, 25, 26, 35; mankind is said to abide 'undir Miðgarði,' *under the Midgard*, Hbl. 23; mest manna-val und Miðgarði, Hdl. 11, 16, Fms. vi. 423 (in a verse); um allan Miðgarð, Blanda. Miðgarðs-ormr, m. *the Serpent of Midgard*, the world serpent of the ancient mythology hidden in the ocean, whose coils gird round the whole Midgard, Edda 18, 34–36, 41, 42; dólgtr Miðgarðs-orms, *the antagonist of the M.* = *Tbor*, Edda 53; muntú vera ormr sá er verstr er til er menn kalla Miðgarðsorm, Fas. i. 373. In old Icel. translations of legends Leviathan is rendered by Miðgarðsormr, Niðrst. 3, Post. 686 C. 2. The god Thor is called Miðgarðs-veorr, m. = *the holy one of M.*, Vsp.; miðgarðs verjandi, *the defender of Midgard*, Edda 53; cp. Þórr hefir varðan Miðgarð af þrek, Edda (in a verse).

After the death of Balder the Ragnarök (the last day of the heathen mythology) set in. Balder's death was also symbolical of the victory of darkness over light, which comes every year at midwinter. R. i. 3; [perh. akin to *mjöl*, although with a double *l*]:—*fresh powdery snow*; sá snjór er hvítast er, ok í logni fellr, ok mjöll er kallaðr, Bárð. 2 new Ed.; *gördisk ill færðin ok var mjöllinn djúpr*, Fms. v. 179; *vaða mjöll, Sighvat* (Fb. iii. 240); *mjöllinn var laus, ok rauk hón*, Fb. i. 579; *sjórinu rauk sem mjöll, the sea 'reeked', or broke in spray, like mjöll*, Vígl. 22; *eru þeir kasaðir í mjöllinni*, Fs. 143; poet., *haus-mjöll, floating hair*, Skálda (in a verse); *sjóð-m., the snow of the crucible = silver*; *svan-m., the 'swan-drift' = the waves*, Lex. Poët. II. a pr. name of a lady, Landn. **mjalla-hvítr**, adj. = *mjallhvítur*, *white as drifted snow*.

Mjöllnir, m., in the vellums spelt *mjöllnir*, with *o* and *ll* (see Bugge in the foot-note to Vfm. 51); the *ll* seems to indicate that the *n* is radical, for if it were inflexive, it would be *mjöllair* (with one *l*); [therefore the derivation from *mala* or *mola* (*to crush*), though probable, is not certain; the word may be akin to Goth. *milbma* = *cloud*, Swed. *moln*, Dan. *molm*; cp. provinc. Norse *molnas* (Ivar Aasen) = *to grow dark from bands of cloud arising*]:—the name of *Tbor's hammer*, Edda passim, Ls.

MJÖT, f. [Ulf. *mitaps* = *μέτρον*; O. H. G. *mez*; Germ. *masz*]:—*a measure*; kann ek mála mjöt, *I know the measure of words, bow to make a speech*, Höfuð. 20; *þess kann maðr mjöt, a man knows the measure of that*, Bugge's Hm. 60 (see foot-note as to the reading in Cod. Reg.); *mjötúðr*, from *Vsp.* the preceding poem, seems to have been in the transcriber's mind, and so he first wrote *mjotvpe* and then dotted the *v*, denoting that the last three letters were to be struck out. A fem. *mjotuð* would, it is true, agree with the Goth. *mitaps*, but it does not suit the rhythm, in which a monosyllable is required.

mjötúðr, m., spelt *mjotvðr*, Vsp. 2, which form can only be an error of the transcriber, for both passages, verses 2 and 47, represent the same

word; [A. S. *metoð*; Hel. *metoð*; by which word the A. S. homilies, as well as the Heliand, denote *God*, prop. *the 'Meter,' Dispenser*]; the word itself is of heathen origin: in the Icel. it only occurs in old poets, and there in but a few passages, all of which agree, if rightly interpreted, with the A. S. use of the word. It occurs twice in the Vsp.; in verse 47—*Leika Míms synir, en mjötúðr kyndisk, but the meotud is kindled, lighted*, where it seems to be applied to the god Heimdal, (the dawn in the Eastern sky, the morning star? see Prof. Bergmann in his Ed. of Gm. 1871, p. 169); in verse 2,—*nú man ek heima, nú iviðdur, mjötúð mæran fyrir mold neðan, I mind the nine abodes, the nine gigantes (the nine mothers of Heimdal?), the worthy Dispenser beneath earth*; this '*meotud beneath earth*' seems here to represent the god of the nether world, the Pluto of the Northern mythology, with whom all things above originated (Heimdal?); somewhat similar views are expressed in the Platonic Dialogue Axiochus, ch. 12 and 13.

2. *sá er hann með mönnum mjötúðr, such a guardian (helper) is he among men*, Fsm.

II. metaph. and in an evil sense, *weird, bane*; *mjötúðr* is glossed by *bani (a bane)*, Edda (Gl.) ii. 494; *mjötúðr Heimdals, the bane of Heimdal = the beard*; Heimdalur höfuð heitir sverð . . . sverð heitir mannsmjötúðr, *a sword is the bane of men*, Edda 55, from a myth that Heimdal was pierced by a head (used as a bolt): *nema mjötúðr spilti, unless death spoiled her, unless she died*, Og. 14; *ef mér meir m. málrúm gæfi, if death would give me more time for speech* (says the dying Brynhild), Skv. 3. 71; *sá manns mjötúðr, this bane of men*, of a charmed, poisoned sword, Fas. i. (in a verse). The word is found only in the above passages; the explanation given in Lex. Poët. can hardly be the true one. For Hm. 60 see *mjöt* above.

So in Lat. phrases, in manu parentis, manumissio, etc., used of minors, slaves. In Norse the word is used in a special sense.]

B. In the ancient laws and customs matrimony was a bargain (brúðkaup), hence the phrase to buy a wife, kaupna konu; the wooing was often performed by a deputy, and at the espousals (festar) a sum was agreed on, which the bridegroom was to pay for his bride. This sum was called mundr; and this transaction between the damsel's father or guardian and the other party was called mundar-mál or mund-mál, e. g. Nj. ch. 2, Mördr (the father) svarar, hugsað hefi ek kostim, hón (i. e. my daughter, the damsel) skal hafa sextigi hundraða, ok skal aukask þriðjungi í þínum garði: hence the phrases, kaupna mey mundi, to buy a maid by mund; mey mundi keypt; gjalda mund, Skv. 1. 30, Fm. 41, N. G. L. i. 27, 48, Am. 93, and passim. No marriage was lawful without the payment of mund, for even if the wedding had been lawfully performed, without such previous payment of mund the sons of such a wedlock were illegitimate, and were called hornung (q. v.),—hann kallaði ykkur frílu-sonu,—Hárekr sagði at þeir mundi vitni til fát at möðir þeirra var mundi keypt, Eg. 40; the least amount of mund in Norway was twelve ounces, called the poor man's mund (öreiga mundr), N. G. L. i. 27, 54; in Iceland it was a mark, sá maðr er eigi arfgegr er möðir hans er eigi mundi keypt, mörk eða meira fé, Grág. (Kb.) i. 222. On the wedding night the stipulated mund became the wife's personal property, and thus bears some resemblance to the 'morning-gift' (morgun-gjöf) of the later legislation; þá er hjú koma í eina sæng, at þá er konu heimill mundr sinn ok svá vextir af fé því öllu er henni er mælt í mundar-málum, Grág. i. 370. The wife herself or her parents might, in case of divorce after misconduct, call on the husband to pay up the mund and the heiman-fylgja (q. v.) of which he had the charge, Grág. Festab. ch. 51; ella mun ek láta nefna mér vátta nú þegar, ok segja skilti við þik, ok mun ek láta föðr minn heimta mund minn ok heiman-fylgju, Gisl. 16 (p. 32 in Mr. Dasent's Gisl the Outlaw), cp. also Yngl. S. ch. 17; nefndi Mördr (the father) sér vátta, ok lýsti fésök á hendr Rúti (the husband) um fénað dóttur sinnar ok taldi munda hundraða fjár, lýsti hann til gjalda ok útgreiðslu, Nj. 15 and Dasent's Burnt Njal (l. c.), the Sagas passim, as also Grág., esp. the section Festab. ch. vii. 59q. The mundr

therefore was different to the dowry (heiman-fylgja), and has nothing answering to it in the modern law, nor perhaps in the old Greek or Roman customs; hence Tacitus speaks of it as something strange, *dotem non uxorem marito, sed maritum uxori affert*, Germ. ch. 18. On the other hand, the Teutonic rites of marriage call to mind the ancient patriarchal times as described in Gen. xiv and xxix. The etymological connection between *mundium = tutelage* and the Norse word is not altogether clear. In modern Icelandic usage *heiman-mundur* is erroneously used instead of *heiman-fylgja*, q. v.

In mod. usage the word *munu* is far less frequent, and futurity is in speech usually expressed, as in Gothic, by the pres. indic., as, eg fer á morgun, were an ancient would have said, ek mun fara á morgun; but in soleism *munu* is retained, thus, sjá, þú munt barn geta í kvíði þínu, ok þú munt son fæða ok hans nafn skaltú (not muntú) kalla Jesús; hann mun munda verða, ok kallast son hins Hæsta, og Guð Drottinn mun gefa þum sæti síns föður Davíð, og hann mun ríkja yfir húsí Jakobs að

Múspell, *n.* the name of an abode of fire; in the old mythology peopled by *Múspells lýðir*, the men of *Múspell*, a host of fiends, who are to appear at Ragnarok and destroy the world by fire; the prose in Edda 3 may have been derived from some lost verses of the *Völuspá*, for the name appears at the end of that poem (Vsp. 51) as if it were already known; it occurs nowhere else in the Norse mythical songs, except in Ls. 42 (*múspells-megir*). *Múspells-heimir*, the abode of *Múspell*, Edda 4. This interesting word was not confined to the Norse mythology, but appears twice in the old Saxon poem *Heliand*—*mutspell cumit on thiustra naht*, also thiof *ferit, m. comes in dusky night, as a thief fares, i. e. but the day of the Lord will come as a thief in the night, 2 Pet. iii. 10*; and, *mutspellis megin obar man ferit, the main of n. fares over men*, see Schmeller's Edition; a third instance is in an Old High German poem on the Last Day—*dár ni mac denne mac andremo helfan vora demo muspille* = there no man can help another against the *muspell*-doom. In these instances *muspell* therefore stands for the day of judgment, the last day, and answers to Ragnarok of the Northern mythology. The etymology is doubtful, for *spell* may be = the weird, doom, = Lat. *Fatum*; or it may be = spoil, destruction; the former part *mut* or *muod* is more difficult to explain. The Icel. *mús* is an assimilated form.

MÖRK, f., gen. sing. merkr, pl. merkr, [a word common to all Teut. languages]:—a *mark*, in weight equal to eight ounces or half a pound; twenty merkr make a fjórðung, q. v.; eighty merkr = a vætt; þat er lögpundari at átta fjórðungar eru í vætt, en tuttugu merkr skolu í fjórðungi vera, Grág. i. 499. **2.** a *mark*, by weight or value, of gold and silver, eight ounces (átta aurar) go to a mark, 732. 16; mörk silfrs, mörk gulls, þrim mörkum gulls, Fms. vii. 235, Grág., Sagas passim; mörk vegins silfrs, O. H. L. 23; gullbringa ok stóð mörk hvárr, Eg. 464; often used absol. so that the standard can only be seen from the context, verðr hann útlagr þrem mörkum, Grág. i. 16, 132; varðar honum þat sex merkr, tólf merkr, 319; varðar þat þriggja marka sekð, 499; hversu mikit fé er þetta? hann sagði hundráð marka, Nj. 4; Adalsteinn vill gefa skilling mami hverjum frjalsbornum, en mörk sveitar-höðingja hverjum, Eg. 280; hanu skal gjalda hálfa mörk fyrir eyri, Grág. i. 208; þrjú hundruð hundráða eptir forngildu markatáli, Dipl. v. 20; svá mikit ofa-fé at trautt kom markatáli á, Fær. 11; hann var svá auðigr af gulli at engi vissi markatáli, Fms. vi. 176; merkr-kaup, a *purchase to the amount of a mörk*, Gpl. 497; merkr-þjófr, a *thief to the value of a mark*, N. Mr. Dasent's Essay in Burnt Njal. In Icel. the confusion was made still greater, by the fact that (as remarked s. v. eyrir) the word mörk was also used of the wadmál standard (the ell of wadmál), and so the law speaks of a mörk vadmála, Grág. i. 500; mörk sex . . . álma aura, etc., K. þ. K. 70, 172, but this is a contradiction in terms, for mörk is a weight, not a measure: the real meaning is often only to be made out by the context, e. g. in questions of weregild the weighed mark is no doubt meant. **II.** of fluid, a *pin*, viz. half a pott; in mod. usage all fluids and vessels holding fluids are thus measured, tveggja, þriggja . . . marka askr.

This ancient 'tax' was also imposed by the Norsemen on conquered countries, the name gave rise to strange legends; thus, king Thorgisl, the Norse conqueror of Ireland (A. D. 830–845), is, by an Irish chronicler, said to have levied a tax of an ounce on each hearth, the penalty for default being the loss of their nose. Prof. Munch, *Norg. Hist.* i. 440, has traced the origin of this legend to the simple fact that the king imposed a 'tax' or *poll-tax* on the conquered Irish, just as Harold Fairhair afterwards did in Norway.

etc. All the above forms occur confusedly even in very old MSS., and even the latest form *nokkorr* occurs in vellums as old as Cod. Reg. of the elder Edda, in the *Mork.*, Gregg, Grág. (Kb.) In addition to the above, there are mixed forms, nekkurr, 623. 41; nekkorar, Fms. x. 388; nekkers, Grág. (Kb.) 22; nökkurja, 623. 50; nakkor, B. B. THE SENSE: the negative particle, the first part of the compound, has quite lost its force, as is the case with *neinn*, q. v.; but the word is used in negative sentences = *any*; á öngum bæ fannsk *nökkurr* maðr, Fms. ix. 355, and so freq. in mod. usage.

NÍÐ, n. [Ulf. neil] = φθλνος; A. S. nið; O. H. G. nid; Germ. neid; Dan.-Swed. nid]:—contumely, Vsp. 56; segja e-m nið, Akv. 35. 2. particularly as a law term, a libel, liable to outlawry:—of a libel in verse, yrkja, kveða nið um e-n, Nj. 70; ef maðr kveðr nið um mann at lögbergi ok varðar skóggang, Grág. (Kb.) ii. 184: the classical passages in the Sagas are Hkr. Ó. T. ch. 36, cp. Jónsv. S. ch. 13 (Fms. xi. 42, 43), Kristni S. ch. 4, Nj. ch. 45, Bjarn. 33 (the verse). Another and even graver kind of nið was the carving a person's likeness (tré-nið) in an obscene position on an upraised post or pole (nið-stöng), for an instance of which see Bjarn. 33; ef maðr görir nið um annan ok varðar þat fjörbaugs-garð, en þat er nið ef maðr skerr trénið manni eðr rístr eða reisir manni niðstöng, Grág. i. 147; when the post was set up, a horse's head was also put up, and a man's head was carved on the pole's end, with dire Runes and imprecations; all this is described in a lively manner in Eg. ch. 60 and Vd. ch. 34, Landn. 4. ch. 4, Rd. ch. 25. The beina-kerlinga-vísur of mod. times are no doubt a remnant of the old niðstöng:—certain stone pyramids (varða) along mountain-roads are furnished with sheep's legs or horses' heads, and are called beina-kerling (bone carline); one of the most noted is on the Kaldadal, as one passes from the north to the south of Iceland, it is even marked in the map; a passing traveller alights and scratches a ditty called beina-kerlinga-vísa (often of a scurrilous or even loose kind) on one of the bones, addressing it to the person who may next pass by; for a specimen see Bjarni 193, as also in poems of Jón Þorláksson, for there hardly was a poet who did not indulge in these poetical licences. In popular legends the devil always scratches his writing on a blighted horse's bone.

From the words—eða þat er Grænlandingar kalla norðrljós, Sks. 74—it appears that the Icel. settlers of Greenland were the first who gave a name to this phenomenon; the author of the Sks. also describes the northern lights as they appeared in Greenland. norðr-lopt, n. the '*north-lift*,' north, *polar heavens*. Noregr, m., gen. *Noregrs*; a later *Noregis* also occurs in Laur. S.; [mod. Norse *Norge*, sounded *Norre*]:—*Norway*, passim; that the word was sounded *Nóregr* with a long vowel is seen from rhymes in Vellekla (10th century), *Nóregr, fóru*; as also *Nóregrs, stórum, Sighvat* (in a poem of 1038 A. D.); the full form *Norð-vegr* (with *ð* and *w*) never occurs in vernacular writers, but only in the Latinised form, *Norbwagia*, which was used by foreign writers (North Germans and Saxons); even the *v* (*Nor-vegr*) is hardly found in good vellums, and is never sounded. The etymology of the latter part = *vegr* is subject to no doubt, and the former part *nór* is prob. from *norðr*, *qs. the north way*; yet another derivation, from *nór* = a sea-loch, is possible, and is supported by the pronunciation and by the shape of the country, a strip of land between sea and mountains, with many winding fjords. The popular but false etymology of the ancients is from a king *Nór* (Orkn. ch. 12), as Rome from *Romulus*:—*Noregrs-höfðingi, -konungr, -menn, -ríki, -veldi, the ruler, king, men, kingdom of Norway*, Grág. ii. 401, Fms. vii. 293, Bs. i. 720, Sturl. ii. 55, Nj. 8, Ísl. ii. 234, passim.

O—Ó

O, the fourteenth letter, is in the oldest Runes, on the stone in Tune, and on the Golden Horn figured by \mathfrak{O} , which was evidently taken from the Greek Ω ; the later common Runic alphabet in earlier monuments has no \acute{o} , but uses u or au instead, e.g. on the Jellinge stone in Denmark. Afterwards the Rune \mathfrak{A} , \mathfrak{B} , or \mathfrak{C} , \mathfrak{D} , appears under the name of \acute{o} ss in the Runic poems— \acute{o} ss er flestra ferða (= fjarða) = all firþis have an \acute{o} ss (mouth). The form was evidently taken from the A. S. Runic \mathfrak{P} , which stands for a , and in A. S. is called \acute{o} s, which answers, not to Norse \acute{o} ss (*ostium*), but to \acute{a} ss (=ans, i.e. the heathen gods); but the Norsemen or Danes in borrowing the Rune seem to have misinterpreted its name or mistranslated it from ignorance of the phonetic laws existing between the A. S. and the Norse. The \mathfrak{A} in Scandinavian Runic inscriptions is therefore a mark of later date (11th or 12th century).

B. PRONUNCIATION.—The o is either short (o) or long (\acute{o}); the former (o) is sounded like Engl. o in *cod*, the latter (\acute{o}) as in Engl. no , *note*; but the rules given at the beginning of the introduction to letter A (p. 1) apply equally to this letter, $b\acute{o}$ d being sounded *bawth*, but $kr\acute{o}$ ss in North-E. *cross*.

C. CHANGES.—In most of the oldest vellums o instead of u is used throughout in inflexions, $-o$, $-or$, $-on$, $-on$, $-od$, $-ot$, $-osk$, $-oll$, $-om$, instead of $-u$, $-ur$, $-um$, $-un$ (Gramm. p. xxxv, col. 1, A); afterwards both forms are used indiscriminately, till in the 15th century the u prevailed, and has kept its place ever since; whether there was a difference in sound, and what, we are unable to state. 2. so also in a few root words, *göð*, *goll*, *fögl*, *oxi*, *skolu*, *monu*, *hogr*, *togr*, *monr* (Dan. *mon*), *smogoll*, = *gud*, *gull*, *fugl*, *uxi*, *skulu*, *munu*, *hugr*, *tugr*, *munnr*, *smugull*; and on the other hand, is *sonr* (*a son*), but *sunnr* the older form. 3. a and o or u interchange in the inflexions, *fagnadr*, *fognoðr*, *fögnuðr*; *kallan*, *kollon*, *köllun*.

4. \acute{u} has changed into \acute{o} in the prefixed negative, \acute{o} -vitr for \acute{u} -vitr (*unwise*). 5. $j\acute{u}$ into $j\acute{o}$, $nj\acute{o}$ ta, originally $nj\acute{u}$ ta; *lj\acute{o}s*, Swed. *lj\acute{u}s*: forms like *mj\acute{o}kr* for *mj\acute{u}kr, *d\acute{o}kr* for *d\acute{u}kr may also be found in vellums, but are very rare. II. \acute{o} , the vowel-change of \acute{a} (see p. 1), is frequently spelt o (*tor*, *nott*, = *t\acute{o}r, *n\acute{o}t), but was in sound different from \acute{o} proper, and has since disappeared from the language, although remains of this 'umlaut' still exist in *n\acute{o}tt*, *\acute{o}l*, *sp\acute{o}nn (= *n\acute{o}tt, *\acute{o}l*, *sp\acute{o}nn), but this o is sounded exactly like common o . So also o and \acute{o} are confounded in MSS., *bornom* = *b\acute{o}*rnom = *b\acute{o}*rnum. For the absorption of consonants see Gramm. p. xxx, col. 1, and the words themselves.*******

¶ Owing to the inability of the Scandinavian languages to sound v (w) before a vowel of the u class, several root words, which in dictionaries of the cognate languages (Germ., Engl.) begin with w , are in the Icelandic to be found under o , as *okr*, *ord*, *orka*, *ormr*, *\acute{O}*ðinn, *\acute{O}*ðr, *\acute{O}*sk, *\acute{O}*mr; as also j , in *ok* (*jugum*), *ostr*, and *ok* the conjunction.

OF, prep. with dat. and acc., the form varies; *umb* is an obsolete and rare form, hence *um*, sounded *umm*, which is far the most common form in old writers, and has altogether superseded both *umb* and *of*: [the 'of' answers nearest to Ulf. *uf*; O. H. G. *oba*; Germ. *ob*; Gr. *\acute{u}*\rho\acute{o}; Lat. *sub*; Sansk. *upa*.] Most of the oldest vellums, as also the poets, prefer to use 'of', yet not all, for the Cod. Reg. of Sæm. Edda in nine cases: out of ten writes *um*, so also did the Cod. Acad. primus (the Kringla) \acute{o} the Hkr.; and this is important, for these two vellums are our chief sources for old poetry; on the other hand, the Cod. Reg. of the Snorra Edda prefers 'of'. Among other vellums the old fragment of the Orkn. S. (Arna-Magn. No. 325) mostly uses 'of', as of *n\acute{o}*tina, Orkn. 110; \acute{o} hans daga, 178; of *J\acute{o}*l, 180; of daga þeirra bræðra, 182; but also 'um', e. g. ofan um sik, ofan um hann, id. The word will be given in full under letter U, so that a few references may suffice here:

I in the sense over, Lat. *super*, with dat. and acc., a. *j\acute{o}*rð grær of ágætum barma, Eg. (in a verse); brann of fylki, Yt.; of svirum, Hornklofi dik flæði of líkum, Fms. xi. 191; sjár þýtr of árum, vi. (in a verse) of bý breiðum, Lex. Poët. β . with acc., of nýt regin, Vfm. 13; \acute{o} dr\acute{o}ttm\acute{o}gu, 11; of líðu, Sdm. 9; of sumar, Vsp. 40; of garð risa, Gs. of lopt ok lög, Hkv.; úlfir gengr of ynglings börn, Eg. (in a verse) vestr fr ek of ver, Höfuðl. 1; liggja of ungan Mörnkára, Fms. vi. (in a verse). II. in a causal sense = Lat. *ob*; of sanna sök, for a just sake justly, Fms. ii. 322 (in a verse); of minna, for a less cause, Glúm. (in a verse); of litla sök, Lex. Poët.; of sannar deildir, id.; of minni sorgir Korm. (in a verse).

OF and **um**, an enclitic particle, chiefly placed before verbs or participles, seldom before nouns; it is obsolete, and occurs only in old poetry and now and then in the oldest prose; the spelling varies, for here too the Cod. Reg. of Sæm. Edda, as also the Kringla, mostly prefer *um*, so as to take examples from the poem Hm., *um skoðask*, *um skygnask*, 1; *um getr*, 8; *um á* (*owns*), 9; *þylsk hann um*, *um getr*, 17; *um farit*, 18; *sins um máls*, 21; *um gelr*, 29; *um þörf*, 38; *um getr*, 58, 65; *um dvelr*, 59; *um víðr*, 74; *um lagit*, 84; *um vakin*, 100; *um komin*, *um sofin*, 101; *um kominn*, 104; *um gaf*, 105; *um geta*, 123; *um heilli*, 129; *um reist*, 145; *um stendr*, 154; *um kann*, 163; of gat, 140; of alinn, 72; of kom, 145; of vitaðr, 100; of bl\acute{o}tið, 145; *vf*, *vf boðit*, 67; *vf heimtir*, 14: thus in this single poem 'um' occurs about twenty-four times, 'of' five times, and 'vf' twice: for the other poems see Bugge's Edition: on the other hand, of *traddi*, Gh. 2; of *þrumir*, Gm. 8; of *hyggi*, 34; at ek öllum öl y\acute{o}r of heita, Hým. 3; of *geta*, 4; of *teknir*, 14; of *heitt*, 32:—in prose, *er maðr má eigi öl koma*, Grág. ii. 209; of *f\acute{o}*rlar, Kb. 14; of *telrat*, 178; *er h\acute{e}*ðan of sér, Ísl. The account of the death of the Berserkers in Eb. ch. 28, referring to the 10th century, may therefore be an anachronism and not an historical fact, for it is reported as extraordinary for Iceland that a bishop of Hólar (a Norseman) in the year 1316 built a 'stone-oven' (brick-oven) in his house, Laur. O. copulative conj.; the mod. form is og, which appears in the 15th century MSS., but the word is usually in the MSS. written thus 7. The dunic inscriptions mostly have auk, which diphthongal form has in the conj. been changed into ok, but is retained in the adverbial auk = *and*. As neither the stone in Tune nor the Golden horn happens to

have the word, we are in the dark as to its earliest Scandinavian form. The particle ok is characteristic of the Scandinavian languages, as distinguished from the Germ. *und*, Engl. *and*; although this is more apparent than real, for the identity of ok with the Goth. copulative particle *jab* and *ub*, Hel. *jac*, has been conclusively demonstrated by Grimm, who also makes out the identity between Goth. *ub*, standing for *bu*, and Gr. *καί*, Lat. *-que*; the metathesis of *ub* for *bu* is analogous to Lat. *ac* = Gr. *καί*. Grimm farther supports this etymology by comparing the Teutonic compounds *ne-hu*, Icel. *confr né*, with Lat. *ne-c* = *ne-que*, which proves the identity of both the suffixed particles, the Lat. *c* or *que* and the Teut. *ub*. The Goth. *jab* is a compound = *já-ub* = *'immo-que'*; the Norse *ok*, too, is prob. a compound particle, the *j* being dropped, and then *já-ub* contracted into *aub* = *auk*; the final guttural *b* (sounded as *χ*), instead of being absorbed by the preceding vowel, was hardened into the tennis *k*. The negative verbal suffix *-a* and *-að*, the nominal suffix *-gi*, and the copula *ok* will thus all be derived from one root,—one of the many instances of the Protean transformations of particles, even the negative and positive being interwoven into the same word. A. *And*, a copula between two or more nouns; í upphafi skapaði Guð himin ok jörð, Edda (pref., Gen. i. 1); ríki ok konungdóm, Fms. i. 23; mikill ok sterkr, Nj. 2; væn kona ok kurteis ok vel at sér, 1; dætr þrjár ok sonu þrjár, 30. If the nouns are many the usage may vary:—the nouns may be paired off, *eldr ok vatn, járn ok málmr*, Edda 36; or the copula is only put to the last, *eldr, vatn, járn ok málmr*; or, if emphatic, it may be reiterated, *eldr ok vatn ok járn ok málmr*; or it may be left out altogether, *málmr, steinar, jörðin, viðirnir, söttirnir, dyrin, fuglarnir, citronnar*, Edda l. c. 2. bæði ok, bæði er hann vitr ok framgjarn, Nj. 6. 3. in comparison, *as, and*, = Lat. *ac, atque*; með jöfnum skildaga ok Hrólfur Kraki görði, Fb. ii. 137; samr maðr ok áðr, *the same man as before*, i. 364; hafa með sér sín epli, ok bera saman ok hin, *and compare them and the others*, Edda 46; hón var þá lílik ok fyrr, Fms. i. 185; þat er mjök sundleitt ok Kristnir menn góra, *it differs much from what Christians do*, x. 171; á sömu leid ok fyrr, i. 253; sansumars ok Steingerðr gekk frá Bersa, Korm. 160; jamvandhæfr ok fjörbaugsmaðr, Grág. i. 89. 4. of an adverbative character, *and yet, but*; mörgum sárum ok engum stórum, Fms. x. 370; þetta eru áheyrrilig boð, ok újafnlig, Nj. 77; úsællig kona erúti, ok (*but yet*) ekki svá at eigi megi sæma við slíkt, Fms. vii. 167. 5. the particle ok connects together the parts of the sentence; þá mælti Frigg, ok spurði, *then spoke Frigg, and asked*, Edda 37; at þú bættir ráð þitt, ok bæðir þér konu, *thou shouldst mend thy condition, and take thee a wife*, Nj. 2:—it is used to mark the progress of a speech or sentence, féllusk Ásum orðtök ok svá hendr, ok sá hverr til annars, ok vóru allir með einum hug til þess er unnit hafði verkit; Loki tók Mistiltein, ok sleit upp, ok gekk til þings...; Höðr tók Mistiltein, ok skaut at Baldri; Æsir tóku lík Baldrs, ok fluttu til sjávar, Edda 37; sendu þeir Ívar til hans, ok skyldi hann vita, Fms. x. 27. III. in some ancient epic poems the ok is as an historical particle put at the head of sentences or verses in a manner which closely resembles the use of the Hebrew *v*; the old Ýtt. is in this respect remarkable,—ok sikling, 1; ok salbjart, 2; ok sá brann, 3; ok Visburs, ok allvald, 4; ok landherr, 5; ok ek þess opt fregit hafðak, 6; ok allvald, 7; ok þat orð, 8; ok hnakkmars, 10; ok varð hinn, 11; ok Hagbarðs, 12; ok þrúliftr... ok sveiðuðs, 13; ok lofsæll, 14; ok Austmarr, ok við aur, ok dáðgjarn, 16; ok ljóshönum, 18; ok ofveg, ok sú frömuðr, 19; ok Ingjald, ok sjá urðr, 20; ok Skæræið, 22; ok nú ligr, 23; ok launsigr, ok buðlung, 24; ok um ráð, ok launsigr, 25; ok niðkvísl, 26;—so used about thirty times in this single poem; in other poems less freq., but yet it occurs, e. g. in the fragments of Vellekla, see also the references given s. v. auk (III). IV. the placing the copula before both the parts to be joined is curious; this only occurs in a few instances in old poetry; ok eimarr átta, 'and' one eight, i. e. one plus eight = nine, Hd. Ó- or *ú*-, the negative prefix before nouns and verbs, [Goth., Engl., and Germ. *un-*; Dan. and Swed. *ú-*, the nasal being absorbed. The Icel. at a very early date changed this *ú* into *ó*, for the very oldest and best vellums use *ó*, not only the Greg., Eluc., Íb., the Miracle-book (Bs. i. 333 sqq.), but also the Grág., the Cod. Reg. of the Sám. Edda, etc.; in later vellums of the better kind *ú* and *ó* are used promiscuously; till about the union with Norway the *ú* prevailed, and is chiefly used in vellums of the 14th century; but in the 15th the *ó* again took its old place, and has been retained ever since, agreeably with the usual pronunciation. The *ó* is therefore the proper Icel. form, e. g. *ó-vitr* = Engl. *un-wise*; that it was sounded thus even in the 12th century is also shewn by the treatise of the second grammarian (Gramm. p. i, col. 1), — *ó eðr ú þat skiptir orðum, svá sem er satt eðr ó-satt (ú-satt)*, Skúlda 171. This change of spelling in the MSS. about (or a little before) the union with Norway cannot have been owing to any change in pronunciation, but was simply a Norwegianism, as were many other cases, e. g. the dropping the *b* before liquids, contrary to the Icel. pronunciation. On the other hand, as for the rest of Scandinavia, the *ú* has been retained in Denmark and in the east of Norway; but *ó* in the west and north of Norway (see Ivar Aasen's Dict.), as also in mod. Swed. (e. g. *o-mijlig* = Germ. *un-möglich*). In early Swed. (in the laws) *u* and *o* are used indifferently. The Orkneys seem to have followed the Icel., to judge from a rhyme in the poem *Jd.* composed by bishop Bjarni (died A. D. 1222), a native of the Orkneys, — *ó-éitan mik sáttar*, the metre of which requires a half rhyme, a rule followed strictly throughout that poem.

B. Of the compds with *ú-* or *ó-*, all but a few words are from *un-*; these exceptional words appear to be contractions, either, *a.* from *úr-*, where we have such double forms as *úr-sekr* and *ó-sekr*, N. G. L. i. 379; *úr-viti* and *ó-viti*, *ó-verðr* and *úr-verðr*, *ó-vænn* and *úr-vænn*, *úr-hæfi* and *ú-hæfa*, *úr-keypis* and *ó-keypis*, *ú-dæmi* qs. *úr-dæmi* (?), *ó-bóta* qs. *úr-bóta* (?), *ó-birgr* and *úr-birgr*; perh. also *ú-helgi* qs. *úr-helgr* qs. *úr-heilagr* qs. *úr-heilagr*; cp. also such words as *ú-megin* and *úr-megna*, *ú-synja* qs. *úr-synja* (?). *β.* from *of*, esp. before a labial or dental; thus, *of-vægr* and *ó-vægr*, *of-frýnn* qs. *of-frýnn*, *ó-sköp* = *of-sköp* (?), *ó-freskr* qs. *of-freskr*, *ó-fyrirsynju* qs. *of-fyrirsynju* (?), *ó-hljóð* or *ú-hljóð* qs. *of-hljóð* (?), *of-dæll* and *ó-dæll*, *of-ljóss* and *ó-ljóss*. In some of these instances doubt may arise, for a double set of compds might have sprung up. On the other hand, the great number of compds with *un-*, *er-* in German and Saxon, and the scarcity of such words in the Norse tongue, lead to the conclusion that many of these compds in the course of time have been lost or replaced by *ú-*; cp. also *of-all* and *ú-valt*, (*of-saka* and *ú-saka*, *of-brýði* and *ú-brýði*, *of-munir* and *á-munr*, *af-vöxtr* and *á-vöxtr*, *af-burðr* and *of-burðr* ?). Since in most Editions the spelling with *ú-* has been adopted in these classes of words, they must be sought for under that head.

óða-kapp, n. = óðaönn.

ÓÐAL, n., pl. óðul; in Norse MSS. it is usually contracted before a vowel (whence arose the forms öðli öðli), and owing to a peculiarity in the Norse sound of *ð* an *r* is inserted in contracted forms, öðra, örðom, N. G. L. passim: [akin to aðal, öðli, eðli, = *nature*; öðlask = *adipisci*; öðlingr, q. v.; A. S. *ēðel* = *patrimony*; it is also the parent word of Germ. *edel, adel*, = *noble, nobility*, for the nobility of the earliest Teut. communities consisted of the land-owners. From this word also originated mid. Lat. *allodium*, prob. by inverting the syllables for the sake of euphony (all-od = od-al); *óðal* or *etel* is the vernacular Teut. form, *allodium* the Latinised form, which is never found in vernacular writers; it may be that the transposition of syllables was due to the *th* sound in óðal; and hence, again, the word *feudal* is a compd word, *fee-odál*, or an *odál* held as a *fee* or *fief* from the king, and answering to heid-launað óðal of the Norse law (heid = *fee* = *king's pay*), N. G. L. i. 91.]

B. *Nature, inborn quality, property*, = aðal, eðli, öðli, q. v.; this seems to be the original sense, þat er eigi at réttu mannsins óðal, Sks. 326 B; þat er helzt byrjar til farmanns óðals, a *seaman's life*, 52; þat er kaupmanna óðal (= *mercatorum est*), 28; jörðum öllum óðal batni, Gh. 21.

II. A law term, an *allodium, property held in allodial tenure, patrimony*. The condition which in the Norse law constitutes an óðal was either an unbroken succession from father to son (er afi hefir afá leift) through three or more generations, N. G. L. i. 91, 237, Gpl. 284; or unbroken possession for thirty or more years, N. G. L. i. 249; or sixty years, Gpl. 284; or it might be acquired through brand-erðf (q. v.), through weregild, barn-fóstr (q. v.); and lastly heid-launað óðal, an *allodial fief*, was granted for services rendered to the king, see N. G. L. i. 91: the óðal descended to the son, and was opp. to útjarðir (*out-lands*), and lausa-fé (*movables*), which descended to the daughter, Gpl. 233; yet even a woman, e. g. a baugrygr (q. v.), could hold an óðal, in which case she was called óðals-kona, 92, jörð komin undir snúð ok snældu = *an estate come under the rule of the spindle*, N. G. L. i. 237; the allit. phrase, arfr ok óðal, 31, Gpl. 250; brígða óðal, N. G. L. i. 86; selja óðal, to *sell one's óðal*, 237. The óðal was in a certain sense inalienable within a family, so that even when parted with, the possessor still retained a title (land-brígð, máldagi á landi). In the ancient Scand. communities the inhabited land was possessed by free óðalsmen (allodial holders), and the king was the lord of the people, but not of the soil. At a later time, when the small communities were merged into great kingdoms, through conquest or otherwise, the king laid hold of the land, and all the ancient óðals were to be held as a grant from the king; such an attempt of king Harold Fairhair in Norway and the earls of Orkney in those islands is recorded in Hkr. Har. S. Hárf. ch. 6, Eg. ch. 4, cp. Ld. ch. 2, Orkn. ch. 8, 30, 80 (in Mr. Dasent's Ed.); cp. also Hásk. S. Goða ch. 1. Those attempts are recorded in the Iceland Sagas as acts of tyranny and confiscation, and as one of the chief causes for the great emigration from the Scandinavian kingdoms during the 9th century (the question of free land here playing the same part as that of free religion in Great Britain in the 17th century). The attempt failed in Norway, where the old óðal institution remains in the main to the present day. Even the attempts of king Harold were, according to historians (Konrad Maurer), not quite analogous to what took place in England after the Conquest, but appear to have taken something like the form of a land-tax or rent; but as the Sagas represent it, it was an attempt towards turning the free odal institution into a feudal one, such as had already taken place among the Teutons in Southern Europe.

ÓÐINN, m., dat. Óðni; [A. S. *Wodan*; O. H. G. *Wodan*, in the Old High German song Phol ende Wodan vuoron zi holza; in the Norse the *w* is dropped, whence *Odinn*]:—*Odin, Wodan*, the name of the founder of the ancient Northern and Teutonic religion, who was afterwards worshipped as the supreme god, the fountain-head of wisdom, the founder of culture, writing, and poetry, the progenitor of kings, the lord of batt and victory; so that his name and that of Allföðr (*Alfater*, the father of gods and men) were blended together. For Odin as an historic person see esp. Yngl. S., the first chapters of which were originally written by Ari the historian, who himself traced his pedigree back to Odin. For the various tales of Odin as a deity see the Edda and the old poems for the legends explaining how Odin came by his wisdom, how he was inspired, how he pawned his eye in the well of Mimir, see Vsp. 22; how he hung in the world-tree Yggdrasil, Hm. 139 sqq.; and the most popular account, how he carried away the poetical mead from the giant Suptun etc., see Hm. 104-110, and Edda 47-49; for his travelling in disguise in search of wisdom among giants and Norns, Vpm., Gm., Vsp. For Odin many names and attributes see Edda (Gl.). The greatest families, the Ynglings in Sweden, Skjöldungs in Denmark, and the Háleygir in Norway, traced their pedigrees back to Odin, see the poems Ýt., Ht., Lan, feðgatal. In translations from the Latin, Odin was, strangely enough taken to represent Mercury; thus, kölluðu þeir Pál Óðin, en Barnab þór, they called *Paul Odin*, but *Barnabas* they called *Tbor*, is an ancient rendering of Acts xiv. 12, cp. Clem., Bret., and passim. This seems to have originated with the Romans themselves; for Tacitus says, 'deorum maxime Mercurium colunt,' by which he can only mean Wodan; the Romans may have heard the German tales of Wodan's wonderful travels, his many assumed names and disguises, his changes of shape, his eloquent his magical power,—tales such as abound in the Edda,—and the might make the Romans think of the Greek legends of Hermes accordingly, when the planetary week days were adopted from the Lat. 'dies Mercurii' was rendered into A. S. by *Wodansdæg*, in Engl. *Wednesday*, in Dan. *Onsdag*, in Norse *Óðins-dagr*, Orkn. 386, Fms. ix. 28: Óðins-nótt, f. *Wednesday night*, N. G. L. i. 17. Óðins-hani, a, i. a bird, *tringa hyperborea*, or the *phalaropus cinereus*, or the red phalaropus see Fjölnir viii, Faber, Edda (Gl.). II. Northern local names: Óðins-vé, n. the *sanctuary of Odin = Odense* in Fünen in Denmark. Knytl. S.: Óðins-salr, m. in Norway, Munch's Norg. Beskr. 79: Óðinlundr, m. *Odin's grove*. In a single instance *Athenis* is rendered i Óðins-borg, and the Athenians by Óðins-borgar-menn, Post. 64 90; the name can only have been formed from the Greek name pronounced with the *th* sound, perhaps by the Northmen at Constantinople who may have associated the name, thus sounded, with Odin's supposed travels from the east to Sweden, and his halts at various places, which were afterwards called after him, as recorded in Yngl. S. As a pr. nam. Othen villicus, Dipl. Ana-Magn. (Thorkelin) i. 23; Oden Thronsdö D. N. iv. 756, 764; Óðin-dís, f., *Baut.*, but very rare. It is noteworthy that the name of Odin is, in the old poets, hardly ever used as appellative in poet. circumlocutions of a *man*; 'málm-Óðinn is a *Æm. leyr* = *warrior*. Óð-inndæla, u. f. a *Æm. leyr*, [qs. of inndæla (?) from of and einðr or inndæll = *strange, odd*]:—a *puzzle (?)*; ek skal kera um óðinda mína sjálfs, *I have to complain of my puzzle, an accident that has befallen me*, Fms. vi. 374. ÓR or or, written with o in older vellums, or now and then even with y, yr; in later MSS. with u, ur, which in mod. Icel. is sounded long, úr. In other Teut. languages this prep. has been lost as an independent word; only the Goth. has *us = ek, ámb*, and the O. H. G. *ar, ir, ur*, which in mid. H. G. was lost and replaced by the adverb *aus, O. H. G. uz*, answering to Icel. *út*, Engl. *out*, a word altogether different from *ór*, see Grimm's Dict. s. v. *er*; *ur*, however, survived as a prefixed particle in a countless number of compds, in A. S. *úr*, in O. H. G. *ar-, ir-, ur-*, in mid. H. G. and Germ. *er-*; causal verbs are formed by means of this prefixed particle, e. g. Goth. *us-wakjan*, A. S. *ú-weccan*, Engl. *to awaken*, O. H. G. *ar-weccan*, Germ. *er-wecken*. In the Scandiu. languages, on the other hand, the independent prep. has been preserved in its fullest extent, whereas the prefixed particle is rare, mostly with adjectives, and is sounded and spelt *úr*, e. g. *úr-endr = exanimis*; seldom *er-*, for *erlendir* (q. v.) is different; *úr- or úr-* seems to belong only to words of later formation, as *ór-laun, ór-skurð, úr-kast, úr-þvætti, refuse*; *úr-hættis, out of time* (from *skera úr, kasta úr*). These compds will be given under the head of *ór- and úr-*. The quantity of the root-vowel in the particle *or, ur* is an unsettled question; the German and Saxon forms *er-, ar-, ur-*, as also the Icel. prefixed *úr-*, seem to indicate a short, the present Icel. pronunciation *úr-* a long, vowel. The MSS. in these cases give no help; in this Dictionary it has been assumed as long (*ór*) in deference to the majority of Editions and the present Icel. spelling and pronunciation.

A. *Out of, from*; as remarked in the introduction to the prep. *af*, the prep. *ór* (p. 3, col. 2) denotes *from* the inside of a thing (*out of which*), and in most cases corresponds to *i*, so that the same case which goes with *or* would also go with *i*, (and thus it answers to *i* with *dat.*, see i. A. I-III); *teknir úr jörðu, taken out of the earth* (answering to *i jörðu*, of anything *lying in the earth*), Fms. i. 51; *ór skóginum*, vi. 225; *yr aftrét*, Grág. ii. 233; *yr héraði*, Ísl. ii. 322, 333; *fara ór landi, to leave the country*, Fms. vi. 284; *ór Þrændheimi*, Eg. 32 (opp. to *i Þrændheimi*); *ór Tungu*, Nj. 95, 192; *Ísland bygðisk ór Noregi, from Norway*, Íb. 4; *austan ór Smálöndum*, Nj. 122; *ór Breiðafirði*, Ísl. ii. 365; *ór*

Akin to this is the legend of three wishes granted to one by some good fairy; hence the phrase, eiga sér ósk, to own a wish; eina vildi eg eiga niér óskina svó góða, a ditty, Manrer's Volksagen. P

P (pé), the fifteenth letter, was not figured in the old Runic alphabet, in which the bjarkan (B) was made to serve for both *b* and *p*; it is found only in very late Runes, as e. g. the Runic alphabet of the Danish king Waldemar (died A. D. 1241), where it is figured **K** or as a dotted **B** (B), Skálda 177, and the Arna-Magn. Runic MS. II. the *p* is in Icel. sounded as in Engl., *pína* = *pain*, *hlaupa* = *leap*.

B. REMARKS.—As all words with *p* initial have been borrowed at different times from foreign languages, the number of them goes on decreasing the farther we go back into antiquity; this is also the case in other Teutonic languages; the vocabulary in Ulf. presents about seven *p* words,—*paída*, *plapja*, *plats*, *plinsjan*, *pungs*, *prangan*, *pund*; the old A. S. poems about the same number,—*plega*, *plegjan*, *pæd*, *pund*, *pynd*, *pyt*, *pad*, *peord* (while the oldest and best, *Beowulf*, has none), see Grein. The ancient Icelandic or Norse poems of the heathen age have still fewer than the A. S.; the first words we meet with are *penningr*, a *penny*, *Bragi*; *pundari*, *Egil* (see *ljóð-pundari*);—which, with some other words beginning with *p*, are from the heathen age. Along with the introduction of Christianity many such words came in, chiefly through the English, e. g. *prestr*, *pína*, *pínsl*, *páskar*, *páfi*, *pistill*, *prédika*: through trade from the Norman-English, *prúðr*, *prýði*, *páll*, *pallr*, *pell*, *poki*, *partr*: and lastly, through the English trade with Iceland in the 15th and 16th centuries, *prenta*, *plúðr*, *petti*, *peisa*, etc.; some few words, too, have since been adopted from the mod. Danish. A few words may be traced to Gaelic, and a few have been traced to the Chudic (Finnish); the scantiness of such words, however, shews better than anything else how very small indeed was the influence these languages had on the Norse, all the more so as the Finnish vocabulary abounds with *p* words. The letter *p* in an Icelandic Dictionary stands quite apart from all the other letters, for it is made up of a motley collection of words, incoherent and broken, containing no roots, no great verbs, particles, or such words as make the stock of a genuine vocabulary. The absence of initial *p* in the Teutonic language is not due to any inability to pronounce it, but to causes inherent to the parent language of the Teutonic as well as the classical languages, for in Greek and Latin the letter *b*, which, according to Grimm's law, answers to the Teutonic *p*, stands exactly in the same predicament as *p* in the Teutonic; there is no single instance of 'lautverschiebung' from a Gr.-Lat. *b* to a Teut. *p* (Curtius); no word beginning with *p* is formed by 'ablaut,' and only a few are derived by 'umlaut' (*prýði*, *pyngja*, *pæla*). For other details see the introduction to letters B and F.

'padd-reaker,' *toad-driver*. 2. in Icel., where no amphibia are found, used of any *insects* or *beetles* in pools or foul water.

PALLR, *m.* [the etymology of this word, as also the time when and place whence it was borrowed, is uncertain; the true Norse word is *bekkr* or *flet*; *pallr* may be of Norman origin, although it is frequently used in the Sagas referring to the Saga time (10th century); even the benches in the legislative assembly on the alþing were called *pallar*, not *bekkir*; but this cannot have been so originally. The word itself is, like *páll*, probably from Lat. *palus*, *pala* = *stipes*, Du Cange; Engl. *pale*, *palings*; in the Icel. it is used of *high steps* (Lat. *gradus*), esp. of any *high floor* or *daís* in old dwellings, sometimes = *flet* (q. v.) or = *lopt* (q. v.), and

lastly of the benches in the hall = *bekkr* (q. v.) The adoption of the word was probably connected with the change in the floor and seats of the halls, as mentioned in Fagrsk. ch. 219, 220, which arrangement of benches was adopted from Norman England, and is in fact still seen in English college-halls, with the raised high floor at the upper end. In Icel. the ladies were then seated on this *daís* (*há-pallr*, *þver-pallr*), instead of being placed, according to the older custom, on the left hand along the side walls, see below, II. 2. As the Sagas were written after this had taken place, so the use of the word, e. g. in the *Njála* (ch. 34 and often), may be an anachronism.]

prim-signa, d and að, [Lat., an eccl. word], to give the 'prima signatio' or 'signaculum crucis', a religious act, preliminary to christening; persons thus signed with the cross were catechumens, and if adults they could join in the social life among Christians; they were also admitted to a special part of the mass (primsignindra messa = the mass for the 'prime-signed'), whereas all intercourse with heathens was forbidden. An infant who died, having received the *prima signatio*, but not baptism, was to be buried in the outskirts of the churchyard, where the consecrated and unconsecrated earth meet, and without burial service,—ef barn andask primsignat, ok hefir eigi verkirt (without signat ok hefir eigi meiri skírn, Sb. l. c.) ok skal þat grafa við kirkju-garð út, þar er mætisk vígð mold ok úvigð, ok syngva eigi legsöng yfir, K. þ. K. (Kb.) 7. A monster-shapen infant was to receive the *prima signatio*, but not baptism, and then to be left to die (exposed) at the church door—þat barn (a monster-child) skal ok til kirkju bera, láta primsigna, leggja fyrir kirkju-dyr, gæti inn nánasti niðr til þess er önd er ór, N. G. L. i. 339; í þessi efan primsigni prestr ok skír, iii. 251; hann primsignaði hann fyrst ok skírði hann síðan eptir síðvenju, Barl. 147. The words in the English Prayer Book—'and do sign him (her) with the sign of the cross'—are remains of the 'signaculum crucis' of the ancient church. During the heathen age the Scandinavian merchants and warriors who served among Christians abroad in England or Germany used to take the *prima signatio*, for it enabled them to live both among Christians and heathens without receiving baptism and forsaking their old faith; ek em primsigndr at eins en eigi skírdr, I am 'prime-signed', but not baptized, Fms. ii. 240, Valla L. 205, Kristni S. ch. i. 2, Fb. i. 346, 357, ii. 137, 243; England var Kristið þk hafði lengi verið þá er þetta var tíðenda, Aðalsteinn konungr var vel Kristinn . . . hann báð þórfól ok þá bræðr at þeir skyldi láta primsignask, þviat þat var þá mikill siðr, bæði með kaupmönnum ok þeim er á mála zengu með Kristnum niðnum, þviat þeir menn, er primsignaðir vóru, höfðu allt samneyti við Kristna menn ok svá heidna, en höfðu þat at útrúnaði er þeim var skapfeldast, Eg. 265, Gísl. 96: see also Vita Anscarii, ch. 24. These 'prime-signed' men, returning to their native land, brought with them the first notions of Christianity into the heathen Northern countries, having lived among Christians, and seen their daily life and worship, and they undoubtedly paved the way for the final acceptance of the Christian faith among their countrymen. It may even be that some strange heathen rites of the last days of paganism, such as the bjannak (q. v.), the sprinkling of infants with water, were due to this cause.

Q

Q (kú), the sixteenth letter, was in old vellums chiefly or only used the digraph *qu*, perhaps under the influence of the Latin; it was afterw dissued in MSS. of the 15th century, but was reintroduced in prin (even Björn Halldrsson's Dict. has a special *Qu*), until of late it has discarded, and *k* is used throughout. All words beginning with *Q* therefore to be sought for under *k*.

R

(err), the seventeenth letter, had in the old Runes two forms; one as initial and medial (radical), **ƿ**; the other as final (inflexive), **ƿ** or **ʀ**.—the last two, **ƿ** is used in the old Runes (stone in Tune, the Golden Run) in the words *gastir, holingar, wiar*, as these inscriptions have finally been read and settled by Prof. Bugge of Christiania; **ʀ** is used in the common Runes; and its name was *re.ð.—reið kvæða rossum sta, in the Runic poem.*

B. PRONUNCIATION, SPELLING.—The pronunciation is as in Italian (in mod. Gr. *rb*), and this still survives in Norway and Sweden, whereas in the Danes have adopted a guttural *r*, which an Icelandic throat is unable to produce. In ancient times radical and inflexive *r* were perhaps different in sound, as may be inferred from the spelling on the old Runic Runes, as well as from comparison; for the inflexive *r* was in the old Runes a sibilant (*s*), so that the Runic **ƿ** and **ʀ** may well have represented a sound intermediate between *r* and *s*. II. The inflexive *r* is assimilated in words such as *heill, steinn, lauss*; dropped in *magl, fors, son, vin*, see the Gramm. — the ancient writers have a double *r* in nouns and adverbs, such as *sárr, stórr, ferr, síðarr, optarr*, &c.; even against etymology, as in *hárr (bigb), márr (a meo)*. In the use of a final *rr* is never sounded. Again, in gen. and dat. fem. plur. and in compar., in words such as *þeirri, þeirrar, þeirra, færri*, &c., the mod. sound and spelling is *rr*, where the ancients seem to have sounded one *r* only, *þeiri, þeirar, þeira, fára*, which pronunciation is said to be retained in eastern Icel.; the Editions, however, have only adopted *rr*. The spelling of the vellums is often dubious, as in this a double *r* is written either dotted (*ř*) or with a small capital *R*, but mostly without a fixed rule:—Norse vellums often give *rs* for *ss* (*mersa = essa, persi = pessi, e. g. in the Hauksbók*).

C. CHANGES.—As the Icel. cannot sound *w* before *r*, a set of *v*'s which in Engl. and even mod. Dan. and Swed. begin with *w*, in Icel. belong to *r*; thus, *rangr, røng, rata, reini, reitr, reista, reka, ríða, reiðr, rindill, risi, rist, röskr, róg, rugl, rólta, qs. wrangr, . . . wrólta*. In a few words the *r* has been dropped after a labial, thus Icel. *víxl = A. urixl, Icel. þeisl = A. S. brídels, Lat. frenum, Icel. bauta-steinn qs. ar-steinn*; Icel. *vá qs. vrá, Hm 25, Skv. 3. 29*; or a false *r* is used, as in the Icel. *ábristir = Engl. beestings, Goth. beist, Germ. beistm; brála and bæla, bál*; analogous are Engl. *pin* and *frin, speak* and *spræcan, Germ. sprechen, Icel. freta, Lat. pedo*:—in a few Norse vellums *ðr* for *ð* is used before *s, l, n, odrla = ödla = ödala, ödrlask = ödtk, Guðr = Guðs, heidnir = heidnir, líðsemnd = líðsemnd, soðrla = sóðrádrleitni = ráðleitni, e. g. the O. H. L. (see the pref. to Prof. Unger's Ed. ix)*, owing to an inability of sounding *ðl, ðs*. Again, metathesis takes place in *ragr, rass = argr, ars*.

All words having a radical initial *b* (*br*) are to be sought for under *b*; the introduction to that letter.

RITA, pres. rit, ritr, rit; pret. reit, the 2nd pers. does not occur; pl. ritu; subj. riti; imperat. rit; part. ritinn; the earliest writers use the strong conjugation; thus in the treatise of Thorodd, ek rit, 165, l. 26, 166, ll. 22-24, 168, l. 10; ritk = rit ek, 166, l. 36; þú ritr, 161, l. 2 from the bottom, 168, l. 19; ek reit, 168, l. 4; part. ritnir, ritin, ritnum, 161, 168-168: in the other instances the weak form seems merely due to the transcriber of the Cod. Worm. of the 14th century, and the old forms ought to be restored; thus, pres. ritar, 160, l. 3 from the bottom, 165, l. 1; pret. ritada, ritadir, 164, l. 31; part. ritad, ll. 3, 32, etc.; mñn. rita for rita, l. 3; Ari also uses the strong form, lb. 4, Hkr. i. 48: in the pref. to Landn. for ritad read ritið (?); reit, Hkr. iii. 347. In writers of later times, as also in later transcripts of old writers, the weak form (ek rita, ritar, ritar, ritada, ritad) prevails; thus in the pref. to Ó. H., pres. rita (once), pret. ritada (five times), ritadi, 248; ritadað and rituð, Sturl. i. 107, Fms. x. 371; ritad, Knytl. S. ch. 1, 21, 95, Hungrv. ch. 1; and so on: the part. ritinn remained longest, thus, eptir sögu Þjóðólfs var fyrst ritin æfi Ynglinga, Hkr. Frissb. (pref.), Fms. vii. 156, Grág. i. 76, Symb. (finc). The Norse vellums seem to know the weak form only, e. g. ritadi, Sks. 563 B. The root to this word is well known in the Scand. languages in derived words, as reitr, reita, rit (q. v.), yet the verb itself, at least in the sense 'to write,' seems to have been adopted from the A. S., as it nowhere occurs on the Runic stones or in old poets, and always means writing on parchment, rísta being used of writing on stone; the original form is rísta: [A. S. *uritan*; Engl. *to write*; Germ. *reissen*; O. H. G. *rizan* = to scratch; Scot. *rit* or *ret*; cp. also Ulf. *writs* = *weepia*, Luke xvi. 17.]

L. iii. 286, 300, Vsp. 59; cp. also the phrase, rísta trénið, Grág., Fs. 56. The phrase in the old Danish Ballads, *kaste runer, to throw Runes*, i. e. *chips* (see hlaut, hlautviðr), may be compared to the Lat. *sortes*, Mommsen's Hist. of Rome, vol. i. p. 187, foot-note (Engl. Ed.), or the Sibylline leaves in the Aeneid. **2.** *Runes as writing*; the word was first applied to the original Northern alphabet, which at an early time was derived from the common Phœnician, probably through Greek or Roman coins in the first centuries of our era. From these Runes were subsequently formed two alphabets, the old Scandinavian (whence again the Anglo-Saxon), as found on the Golden horn and the stone in Tune, and the later Scandinavian, in which the inscriptions in the greater number of the Swedish and Danish stone monuments are

written, most being of the 10th (9th?) and following centuries,—circumstance of the employment of Runes is their being written on keffi (a round piece of wood) as messages (cp. the Gr. *συντάλη*), is freq. recorded in the Sagas, e. g. Gisl. 45, 67, Fms. ix. 390, 49, Gret. 154 new Ed., Fb. i. 251 (of the deaf and dumb Oddny). It doubtful whether poems were ever written in this way, for almost t only authority for such a statement is Eg. 605, where we read th the Sonatorrek was taken down on a Runic stick, the other instan being mostly from romances or fabulous Sagas, Gret. 144, Örvar Odds (fine). This writing on a keffi is mentioned in the Latin line, Barba: 'fraxineis' sculptatur runa 'tabellis,' Capella (5th century). In la times (from the 13th century) Runic writing was practised as a sort curiosity; thus calendars used to be written on sticks, of which th is a specimen in the Bodl. Library in Oxford; they were also used: inscriptions on tombstones, spoons, chairs, and the like: there ev exists in the Arna-Magn. Library a Runic MS. of an old Danish law, a there is a Runic letter in Sturl. (of the year 1241); Runes carved an oar occur in Fs. 177: a hidden treasure in a chest is labelled w Runes, Fms. vi. 271, Sd. 146, cp. also the interesting record in Bs 435 (sex manna bein vóru þar hjá honum ok vax ok rúnar þær sögðu atburð lifláts þeirra).

rún-henda, u, f., or **rún-hending**, f., is the name of *the metre u end-rhymes*, consecutive, not alternate; the word is now obsolete, i in ancient writers it only occurs in two places, the Ht. R. verse 24: in Edda (Ht.), where the Cod. Reg. gives rún-, Edda i. 606 sqq. (foot-notes); but one is tempted to suspect that this is corrupt, and t the true form was **rún-**, as *im* and *un* can hardly be distinguished in MSS.; rún- would yield good sense, whereas rún- is meaningl The metre itself is evidently of foreign origin, borrowed from the A. the first poem in this metre was the Höfuð. of Egil, who had li in England; it was little used throughout the 10th and the follow centuries, and the few poems and fragments composed in it can be tra to Egil's poem as their prototype. G. *rasta*; Germ. *rast*]:—prop. *rest*, but used only in the metaph. sense of *a mile*, i. e. the distance between two 'resting-places,' or 'baiting' points: distances on land were counted by rasts, on sea by vika, which seem to have been of equal length, thus in the old Swed. law, rost at landi, vika at vatni, Schlyter. The ancient Scandinavian *rast* seems to have answered to the modern geographical mile, which agrees with the Latin *mille* only in name, its actual distance being that of the rast, not the Roman *mille passus*. The distances were not measured, but roughly guessed, and varied (like the Swiss *stunde*) according to the nature of the ground traversed, the rasts through mountains or deserts being shorter than those in an inhabited district; hence such phrases as, þat eru langar tver rastir, *it is two long rasts*, Fms. ix. 393; þeir sóttu svá hart þessa eyðimörk, at skammar vóru þá þrettán rastir eptir, *thirteen short rasts*, viii. 33: the following instances may serve, in Norway the distance from Oslo (the present Christiania) to Eidsvold was counted at eight 'rasts,' ix. 376; þeir fórusk svá nær at eigi var lengra til en röst, 371; þeir ríða síðan átta rastir . . . þrjár vikur eptir vötnum, 376; ríðu þeir nökkura hálfá röst, 523; þat var einu nótt, at eigi var lengra milli náttáða þeirra en röst, viii. 63; rastar langr, ix. 394, 402; rastar-djúpr, Hým.: of the old forests, Eíða-skógr er tólf rasta langr, Fms. ix. 354; skógr tólf rasta langr, . . . þann skógr er átján rasta var yfir, viii. 30, 31; sú skógr er Tvívíðr heitir, hann er tólf rasta breiðr, Rb. 332; fjögurra rasta ok tuttugu, Gullþ. 52:—six 'rasts' done afoot in one night is recorded as something extraordinary, Ólafi kom njósun um kveldit, en þeir gengu um nóttina sex rastir ok þótti mönnum þat furðumikit farit, þeir kómu á Ryðjökul um óttu-söng, Fms. vii. 317; átta röstum, þkv.: an immense distance is given at 'a hundred rasts, hundrað rasta á hverjan veg, Vþm. (Edda 41); hundrað rasta heyrði smell, Skíða R. 150: heim-röst, *a homestead*; út-röst, *the outskirt*.

S

S (ess), the eighteenth letter, was, in the old Runes, on the Tune, and the Golden horn, figured Σ ; in the common Runes the latest Runic inscriptions (12th and following centuries) the I name was 'Sól' (*Sun*)—Sól er landa ljómi, in the Runic poem was specially, from its form, called the 'kné-sól' (*knee-sun*).

B. PRONUNCIATION, CHANGES.—Sounded sharper than the *s* in the mod. Icel. pronunciation the only sibilant sound; in *o* and *z* were distinguished in sound as well as in writing, wards the *z* sound was lost or assimilated with *s*.

II. *s* into *r*, as vera, var, er, for vesa, vas, es; as also the participle Gothic *s* into Scandinavian *r* in the words, Goth. *bausjan*, *ar* heyra, eyra; the inflex. Goth. *-s* into Scand. *-r*: an assimilation place in such words as laus-s, ís-s, for laus-r, ís-r; again, in vellu *s* in such forms as búss (gen.) from bú, nýss = nýs, hirðiss = hirð in mod. usage this inflexive *s* is dropped in sound and spelling the ancients, on the other hand, said vissa, vissi, mod. vísra, *v entum, sapienti*;—*sn* is sounded *stn*, stnúa, stnóri, stnögg, stn snúa, snóri, snögg, snjó . . . , and thus spelt in some Norse vell (the Barl.): here come in also such forms as laustn, njostn, ristn njósn, risna, reistn and reisin, O. H. L. (pref.) ix; so also the f ríðr, Ást-leifr, Ást-lákr (see the remarks s. v. ást) = Ás-ríðr . . . Baut. **2.** *skl = sl*, thus sklakka = slakka, D. I. i. 280, rare: cp. the Germ. spelling *schl* = Icel. and Engl. *sl* (Germ. *s* Icel. slá); as also the Fr. *esclave* and *slave*.

3. *sk* corr. *skr*, skokkr, skykkjum, and skrokkr, skrykkjótt; analogous skjallr, Engl. *sbri*ll:—*sk* for *s*, in sjaldan and skjaldan, Icel. Dan. *skör-leuned*. **4.** *sk* answers to Engl. *sb* (skip, fish *sbip, fish*), except in a few words, as Engl. *skin, score*, which borrowed from the Norse. There are more words begin *s* than with any other letter of the alphabet; this is due to the tion of *sk, sm, sp*, and *st*.

SADDR, part., older form saðr, Hým. I, which answers to and Lat., [Ulf. saþs, Luke vi. 25, xv. 16; O. H. G. *sat*; Lat. *s* seða]:—*sated, having got one's fill*, Hým. I; vera s. á e-u, I e-s, Hbl. 3; s. lífdaga, *full of days*, Bible; hálf-s., *half sated*.

saga, að, *to saw, cut with a saw*, Barl. 166, Fms. vii. 89.

SAGA, u, f., gen. sögu, pl. sögur; gen. pl. sagna is rare; and in the gen. sing. sögu- is preferred, thus sögu-bók, sögu-fróðr, wh is used in a collective sense; when gen. sagna- is used it is often garded as borrowed from sögu, as in sagna-fróðr, sagna-meistari; se saga, however, occurs in dami-sagna, Stj. 560; Orkneyinga-sag 90, l. 3 from the bottom: [from segja; cp. Engl. *saw*; Germ. *sagen*].

A. A story, tale, legend, history. The very word owes its the fact that the first historical writings were founded on tradit the written record was a 'saga' or legend committed to writ story thus written was not even new, but had already taken s had been told to many generations under the same name; h the written history and the story told were both alike called Saga, Gr. both were called λόγος (Herod. i. 184, ii. 161, vi. 19). instances when history is mentioned by name it is difficult to say a *told* or *written* Saga be meant; the former seems to be the in the Landnámia—þar hefst saga Harðar Grimkels-sonar ok Geir 62; þar gördisk saga þeirra Þorbjarnar ok Hávarðar ens halta, björn var víga-maðr mikill, ok er saga mikil frá honum, 150 gördisk saga Ísfríðinga ok víg Þorbjarnar, id; þar af gördisk s móðs gerpis ok Grimólís, 157; þar af gördisk Svarfðæla saga, gördisk Þorskríðinga saga, 124; ok þar var Þórðr gellir leiddr f tók mannvíðing, sem segir í sögu hans, 111. Selund, f. the ancient name of *Zealand*, Edda (begin.), Fas. i. (Sögubrot), and so called in old poems.

SEM, a conjunction, and a relative particle, probably from the same root as *sam*, *sama-*, denoting *as, the same, the like*; if so, the conjunction would be the original, and the relative particle the derived use; in old writers 'sem' is in general use as a conjunction, while the pronominal 'sem' is rare, for 'er' or 'es' is the old relative particle: but in mod. usage the conjunction has been almost displaced by 'eins-og,' whereas 'sem' as a relative particle has got the better of 'er.'
